

Redhat / CentOS 7 - Grapical Installation

The graphical installation interface is the preferred method of manually installing Red Hat Enterprise Linux. It allows you full control over all available settings, including custom partitioning and advanced storage configuration, and it is also localized to many languages other than English, allowing you to perform the entire installation in a different language.

So let's start!

1. The first screen of the installation program is the Welcome to Red Hat Enterprise Linux 7.3 screen. Here you select the language that Anaconda will use for the rest of the installation. This selection will also become the default for the installed system, unless changed later. So do your choice, then click "Continue"

2. This leads us, to the Installation Summary screen, the central location for setting up an installation. Hier starten wir nun auch schon bereitz, mit unserer ersten Konfiguration:

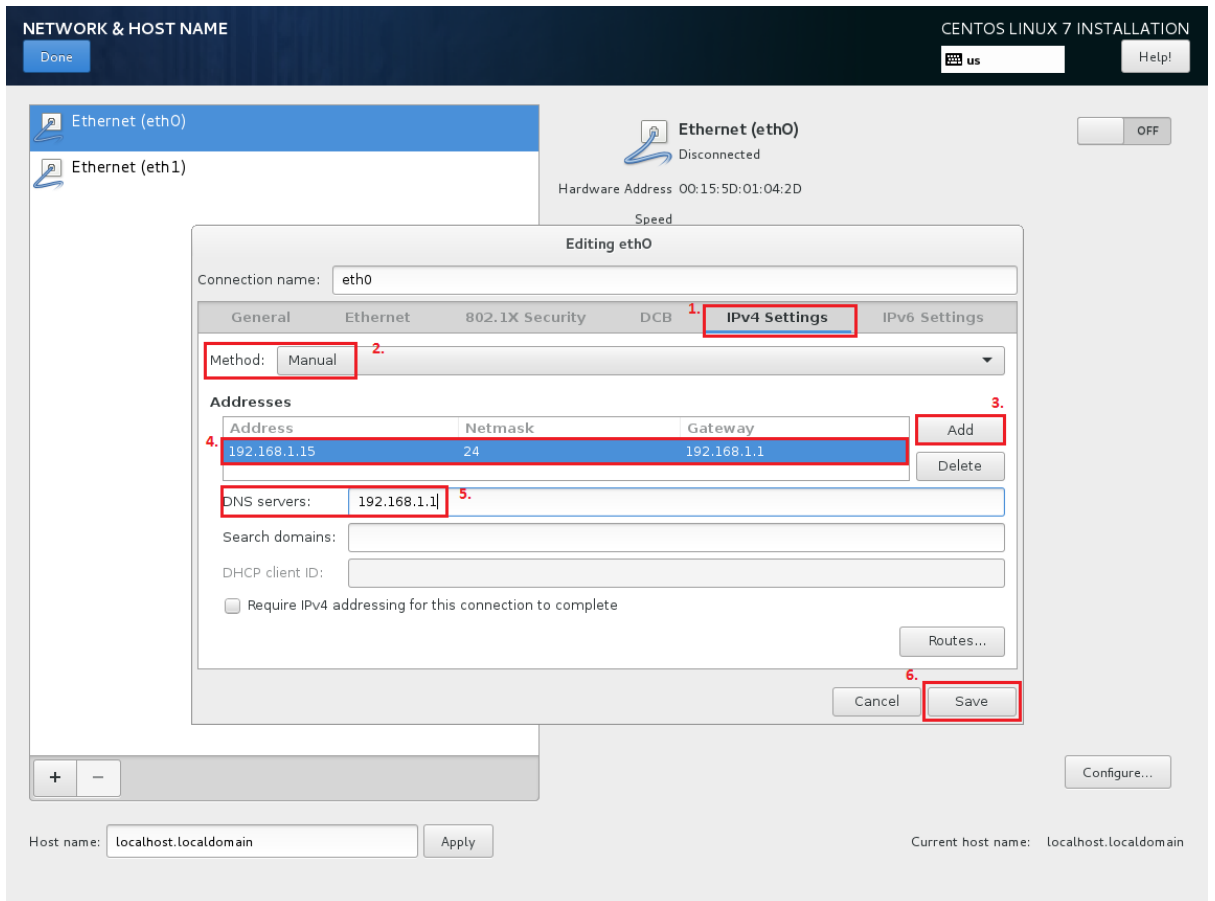

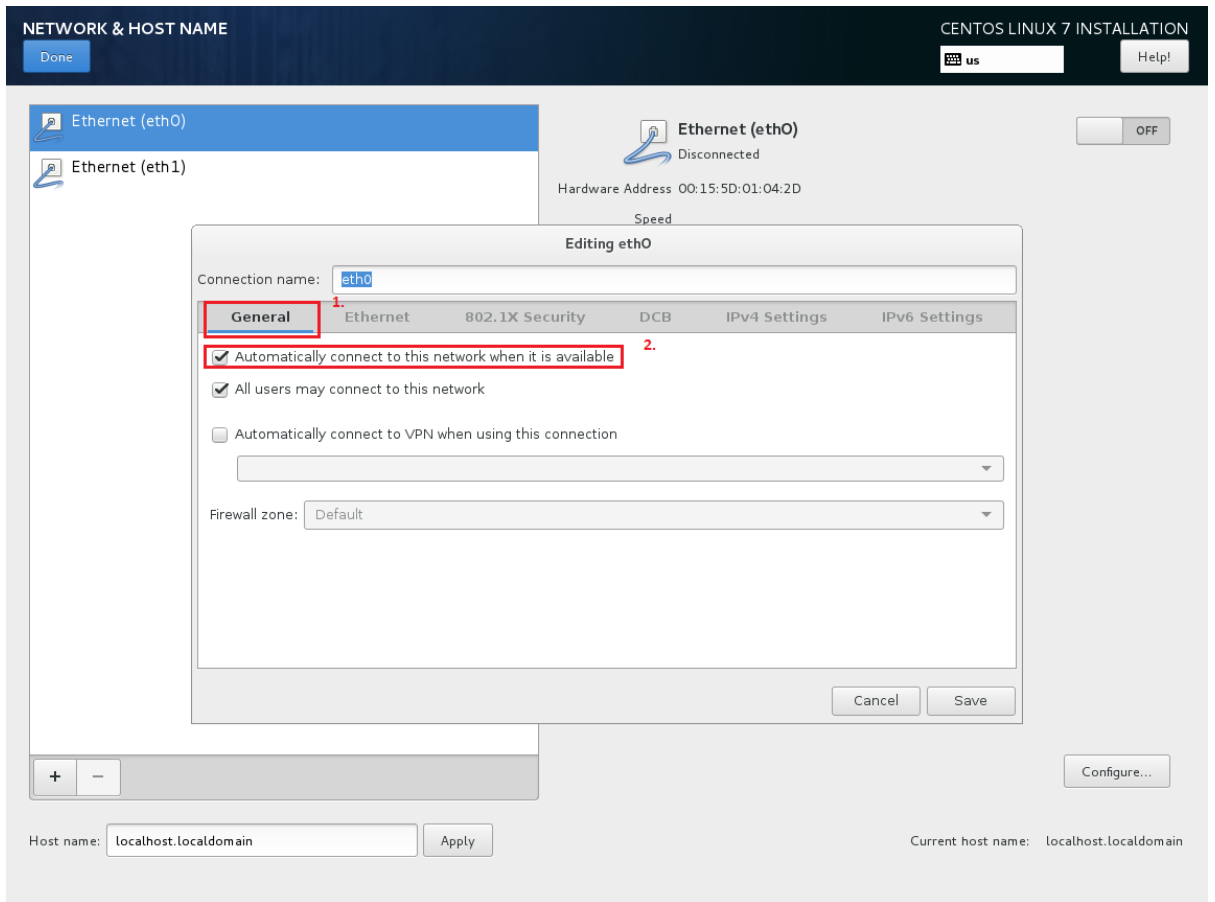

Netzwerk Konfiguration

The image shows the 'INSTALLATION SUMMARY' screen for CentOS Linux 7. The interface is divided into several sections: LOCALIZATION, SOFTWARE, and SYSTEM. Under LOCALIZATION, 'DATE & TIME' is set to 'Americas/New York timezone' and 'KEYBOARD' is set to 'English (US)'. Under SOFTWARE, 'INSTALLATION SOURCE' is 'Local media' and 'SOFTWARE SELECTION' is 'Minimal Install'. Under SYSTEM, 'INSTALLATION DESTINATION' is 'Automatic partitioning selected' and 'KDUMP' is 'Kdump is enabled'. The 'NETWORK & HOST NAME' section is highlighted with a red box and shows 'Not connected'. At the bottom, there are 'Quit' and 'Begin Installation' buttons, with a warning message: 'We won't touch your disks until you click 'Begin Installation''. A footer message says: 'Please complete items marked with this icon before continuing to the next step.'

The image shows the 'NETWORK & HOST NAME' configuration screen. It features a list of network interfaces on the left: 'Ethernet (eth0)' (highlighted with a red box and labeled '1.') and 'Ethernet (eth1)'. On the right, details for 'Ethernet (eth0)' are shown: 'Disconnected', 'Hardware Address 00:15:5D:01:04:2D', 'Speed', and 'Subnet Mask 127.0.0.1'. At the bottom right, a 'Configure...' button is highlighted with a red box and labeled '2.'. At the bottom left, the 'Host name' is set to 'localhost.localdomain' with an 'Apply' button. The current host name is also 'localhost.localdomain'.
