Welcome to wiki

The following wiki was created with great care by Michael Reber. All documented topics have been tested and are working. Most know-how topics are publicly accessible, but are expressly intended for personal use only and not for publication on other sites. If you are interested in participating in this Wiki, you can send me an email to "michael.r467@gmail.com" and explain which topic you are familiar with. I will then create a personal account for you.

Warning: This is the old wiki of michu-IT and it isn't updated anymore. The new is found here: https://wiki.michu-it.com/ - Login needed.

Note: Please follow our documentation criteriums and put new stuff only inside correct place. If you are not sure, ask. Thanks

Server Installations

Installation instructions for different services under Rethat 7, CentOS 7, Debian Jesse, Ubuntu Server 16.04 and Windows Server 2016.

	Redhat / CentOS	Installation guides and tutorials for Red Hat and CentOS 7 / 8
	Debian / Ubuntu	Installation instructions and tutorials for Debian & Ubuntu 16.04.
